

**AMENDMENTS TO THE CLAIMS**

Please amend the claims as indicated in the below listing of claims that will replace all prior versions and listings of claims in the application.

**LISTING OF CLAIMS:**

1. (Currently Amended) A ~~system and~~ method for producing a telephone conference record, the method comprising ~~the steps of:~~

detecting when the user has called a recorder port, wherein the recorder port is one of a predetermined number of recorder ports, the predetermined number being at least one and being determined to provide a statistical grade of service;

opening a call record and recording the telephone call when the user is connected to ~~a~~the recorder port;

detecting when the user's telephone line is disconnected; and

stopping ~~stop~~ recording and ~~else~~ closing the call record if the user's telephone line is disconnected.

2. (Currently Amended) The ~~system and~~ method of claim 1, further comprising capturing the calling line identification associated with the user if the user has called a recorder port.

3. (Currently Amended) The ~~system and~~ method of claim 1, wherein the user calls another party prior to calling the recorder port.

4. (Currently Amended) The ~~system and~~ method of claim 1, wherein the user calls another party after calling the recorder port.

5. (Currently Amended) The ~~system and~~ method of claim 1, wherein the recorder port is associated with a PBX.

6. (Currently Amended) The ~~system and~~ method of claim 5, wherein the user is associated with the PBX.

7. (Currently Amended) The ~~system and~~ method of claim 5, wherein the recorder port is one of a plurality of recorder ports associated with the PBX, and wherein the call to a recorder port may be connected with any of the plurality of recorder ports not recording at that time.

8. (Currently Amended) The ~~system and~~ method of claim 7, wherein the user is associated with a hunt group that is configured to only a distinct subset of the plurality of recorder ports.
